EXPERIENCE

Credit Adjustments, Inc, Defiance, OH - *Student Loan Debt Collector*

AUGUST 2018 - JUNE 2019

Update accounts daily to insure proper steps are taken to get borrowers into a repayment plan. Take all necessary steps to get borrowers out of the defaulted status. Keep steady contact with borrowers to make sure account is taken care of per Department of Educations standards. Keep up a fast pace to meet quota for the month. Stay compliant with FDCPA. Follow instruction and direction per company standards. Kept my update time under 1 minute to insure I am taking the proper amount of calls per day.

United States Postal Service, Napoleon, OH - Rural Carrier Associate

JAN 2018 - AUG 2018

Sort mail in respective boxes to begin process. Set up a order sequence for dropping off packages in my personal vehicle. Delivery mail, marketing pieces, and packages currently once a week.

Walmart, Defiance, OH - Pharmacy Technician/Produce Manager/Stocker

MARCH 2015 - JULY 2017

- Produce Manager: Manage up to six associates and give tasks with time frames. Keep consistent on hands, maintain produce on shelves to the best of my ability, increase profit this year to last year. Co-managed other fresh department when managers are off work or on vacation, change prices, markdown items if need be, merchandise product, plan for holiday sale boosters, and maintain.
- Pharmacy Technician: Entered new patient profiles and prescriptions into medication input software system. Communicated directly with doctors' offices via telephone, fax and email. Provided friendly customer service at prescription drop-off and pick-up counters. Worked closely with pharmacists and used medication input software to safely and accurately dispense medication.
- Stocker: Work through freight and sorting until completion. Lifting anywhere from 50 pounds daily. Assist new associates with learning daily tasks and formalities. Keep up my area and stock freight until 11 pm

EDUCATION**Lambda School, Silicon Valley, CA - Full Stack Web Development**

JUNE 2019 - CURRENT

Florida Atlantic University, Boca Raton, FL- Associates of Science

AUGUST 2011 - DECEMBER 2014

PROJECTS

Lambda Labs/Internship

October 2019 - December 2019

Two month-long final team project that gives students the opportunity to work in teams and build functioning products from start to finish. This project focused on working with a real life stakeholder for connectourkids.org . The team created dashboards to help social workers, funders, and the general public understand the importance and scale of the work enabled by Connect Our Kids. I primarily worked on the backend of the project with main importance being creation of the data via Google BigQuery, then querying the data via lambda functions to send working stable endpoints for the front end to display.

Build Week-- Java Back End Developer(one of two)

September 2019

I was one of two back end developers working on developing a fully functioning Java back end for the project. I fleshed out most of the project the weekend prior to starting the project to give our front end developers working endpoints and swagger documentation to achieve what they needed to pass our build week. This was a week long endeavor that took me roughly 4 days to fully have available for usage.

Build Week-- Senior Front End Developer (one of three)

August 2019

I was one of three senior front end developers working on state management through the use of redux. My responsibilities included assisting with making the decision on what state management system to implement, assisting the junior react developers with debugging, and laying out components needed for the project to have some organization.

Build Week-- Front End Developer

July 2019

I was one of three junior front end developers working on this particular project. My responsibilities included building the structure , functionality, and styling to the login page, user profile, toggle, and the interval section.

Build Week-- User Interface Developer

June 2019

I was one of three User Interface team members for the project. We each made our own versions of the marking page, about page, as well as the gallery.
